#### **Synopsis of Presentation (provided by the speaker):**

Aneka/ Secu Glass Sdn Bhd would like to introduce to you all types of Security Glass with different applications using the make-up of glass, polycarbonate, acrylic and special formulated resin interlayer's.

We would also like to briefly and shortly introduce its new, state of art, Fire Resistant Glazing System, Clear Run EI, for use as partitions, alongside fire routes in office, car parks and even shop fronts.

Clear Run EI is a butt-jointed glazing system with the advantage that it can meet that requirement of BS476 pt22 for both 30 and 60 minutes integrity and insulation with significantly reduced framing elements needed for it to achieve its performance requirements.

if you want to know more about Security Glass (Crime Prevention, Anti Bandit, Bullet Resistant & Anti-Blast Glass) & Clear Run EI, please contact us at 03-62749088 or via our email at [enquiry@anekaglass.com](mailto:enquiry@anekaglass.com) and request our sales team to attend you.

Established since 2002, Secuglass had set a gal to be Malaysian Company which is capable of producing wide ranges of bullet resistant glass products.

With the persistent effort in research & development, supported by the high spirit and dedicated work force, Secuglass accomplished the 1<sup>st</sup> generation bullet resistant glass products with the make-up of "glass and glass" within one year. The commercialization of these 1<sup>st</sup> generation products enable Secuglass to recoup most of its R&D cost which then allowed it to move on to next stage of R&D for the 2<sup>nd</sup> generation bullet resistant glass products.

In the year 2005, Secuglass managed to break through in its R&D and successfully produced bullet resistant glass products with glass and polycarbonate combination. These lighter and stronger products are compatible to those manufactured in Western countries. Within the same year, Secuglass was granted the Pioneer Status. Equipped with some small scale prototype machines, Secuglass only managed to supply projects with longer delivery lead time and smaller quantities. Knowing the current production capacity will not bring the company much further; Secuglass had tried to apply for the Government grant pertaining to commercialization of research & Development Corporation) had offered Secuglass a 50-50 matching grant. With that the company had purchased the plant & machineries which facilitated the company to commercialize its products in a larger scale.

Secuglass has now achieved its initial goal as the Market Leader in Bullet Resistant Glass in Malaysia. In line with this, we also apply for trade mark to establish our brand "Secuglass" in Malaysia and in foreign countries. However we shall not content with the current achievement. Instead, we shall work even harder in our R&D, aiming to nurture Secuglass products as one of the top Bullet Resistant Glass products in the International Market and one of the well established brand.

Speaker's Biography (provided by the speaker):

**Mr. Ho Chong Choai**, Managing Director & Founder of Aneka glass and Secuglass Sdn. Bhd. Born in a family of Glass Merchant in Malacca, he has learnt about glass since his childhood. Having 13 years of experience in glass business, Mr. Ho has positioned his company as one of the market leaders in supplying specialty glasses. With the continuous effort of R/D, his company Secuglass, has become one of the most established security glass manufacturers in Malaysia and the neighboring countries. The personal involvement and experience in the R&D of security glass has equipped himself with good knowledge of security glass.

**Mr. Leo Breukers**, born in Netherlands in 1965 and located in Switzerland with the family living in Helsinki, Finland. Studied International Marketing (BBA) in the Netherlands and after completing the studies he moved to Finland in 1989 to start working for Finnmap. Finnmap was the joint international marketing and sales network of the Finnmap paper industry. Located first in Helsinki Finland, moved to Brussels Belgium in 1992. At Finnmap I was responsible for the setup and development of a unit looking after the interests of multinational publisher and printers. Finnmap was discontinued in 1996. From 1996-1997 WWF Paper Corporation, a US based paper merchant group, responsible for the European operations. In 1997 N-Sorelle was founded in Finland to purchase paper on behalf of US based multinational companies' European subsidiaries. The operations were moved to Switzerland in December 2005. In June 2008 N-Sorolle became marketing and sales consultants for Viewcol, an Australian based producer of high resolution imagery on PET foil for lamination in safety glass. Laminating Viewcol with the Bridgestone Evasafe premium interlayer give the best results, therefore, the Evasafe global distribution network is used for the sales and marketing of Viewcol. In 2009, N-Sorelle became the Bridgestone Evasafe distributor for Scandinavia, the Baltic States and Singapore and Malaysia on a temporary basis.

Presentation will be on the Green Index for the Solar Industry for the Building Industry and Safety glass.

**Mr. Patrick Mok**, being the General Manager overseeing the business prospects covering the whole area of Asia Pacific for C3S Far East Limited, beside running a regional sale office in Hong Kong. Patrick himself is equipped with the qualification of MBA and tens of years of experience exposing in the industry of building and decorative materials in Hong Kong. Moreover, Patrick has acquired various products training in Hong Kong and overseas.
