

KNOW YOU CC ...

The Committee Member 2020-2021

Ar. Chan Foong Sing

Everyone of us is coming from different back ground and here we are sharing the same platform to explore our journey through PAM Sabah Chapter...

My journey to spark at Sabah Chapter eventually via the activities held in the event of Walkability Workshop 2016, thanks to organizers, attendants and also Prof Takazi Okuda. Far before that I'm just a member of "normal attendant" since I've been joining PAM so long in mid 1995 as Graduate Member, and qualified as Corporate Member in late 2001...

At that time of booming, I was involving in township mixed developments and also a few blocks of high rise building which comprised of residential and commercial. Still in my memory that one or two wedding photographs were taken from the site, to reflect works & career, marriage & family both are important part of an architect's life, if one might be in black & white and the other could be in colour. Of course also doing industrial buildings, factories and warehouses in northern chapter, most impressively to see the first High Tech Park in Malaysia, how Kulim Hi-Tech Park to form their own local authority as well as implementation of the guideline in planning and architecture in the late 1990an...

Lacking of foreign exposure that made me decided to gain my experiences in Shanghai and Dubai before coming back to Kota Kinabalu. I still can remember my foreign friends used to tell me to witness "one quarter of the tower cranes in the world" were working day and night in one single metropolitan. It's amazing to see how Arabians are building man-made islands from the sand in the sea in such a nice palm shape...It sounds crazy but it's real until I seen it by myself...

One door closes another opens, life always full of surprises...

I like to travel and always treat my journey in PAM to be a wonderful trip to share and care. Be frank, I'm not so decisive to be a CC until an architect friend gently approached me in early 2019. After all this time, I find Walkability and CSR both have a very wide stage to explore. Unpredictably this Covid-19 pandemics "matched" me to participate in the set-up of Likas Quarantine Centre. Really appreciated the knowledge and process gone through so far in the Chapter, and I wish our members could be able to participate more and more in the PAM platform. Life is like a exciting journey, a lot more to enjoy cause we just can't imagine what's the nice scenery awaiting for us in the next stations...

Let's...Firing Our Passions...and...Sparkling Our Profession...here we go!
CHEERS...THANK YOU !!!
